

Crown Mobile

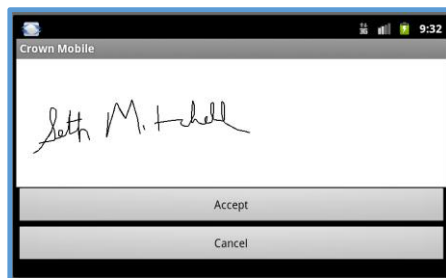

Integrated technology to give you the edge.

Crown Mobile is a powerful integrated technology providing all the key benefits of time savings, reducing costs, increasing productivity and improving your service and image to your shipping customers – all giving your company the competitive edge.

- 2-way communication between dispatches and drivers provides you with timely and accurate shipment status information
- Voice communication eliminated between dispatcher and drivers as dispatch screen is automatically updated by drivers' actions
- Customers updated in real time by Crown's EDI, Crown Connect or auto-emailing modules
- Software automatically notifies dispatch when order has been sent to the phone, when the order arrives to the phone and when the driver has viewed the order
- Signature capture feature displays signature on POD report and Crown Connect portal
- Phone's camera can send images of freight back to dispatch and mark freight OS&D (Over, Short, and Damaged)

Crown Mobile for Android POD Entry by Driver

Crown Mobile for Android Signature Capture
